FortiLink Security System

Revolutionizing Security Standards with Quality, Technology & Innovation

FortiLink perimeter security panels offer simple installation, durable environmental resistance, and an aesthetic look. The patented ZINALPRO® coating consisting of an alloy of zinc and aluminum allows our products to be installed with a galvanized look finish and no additional coating required.

What do we offer?

Using FortiLink panels in ZINALPRO® finish, we have designed a system that allows customers to fortify their existing chain link structure. This creates an anti-climb, anti-cut barrier without the hassle of removing the chain link fence. New fence installation? No problem! We can help you with the complete installation materials list as well.

BENEFITS

1

Enhance security to No-Cut No-Climb system using existing perimeter fencing

3

Modular system without any welded process needed further

2

High durability, does not require maintenance.

4

Available in ZINALPRO® Wire with an alloy of zinc and aluminum that doubles the durability.

Coating

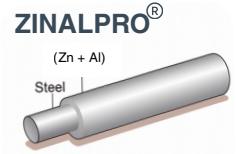

Our advanced ZINALPRO[®] 2000 coating is a lightweight, cost-effective solution for unbeatable corrosion resistance.

Features

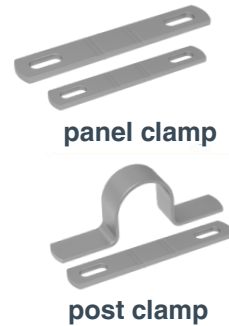

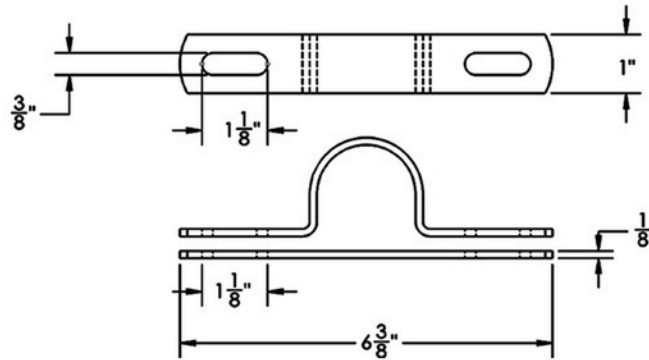

- Cathodic protection
- Smooth surface
- High temperature performance
- Compared to zinc coatings (Exposure up to 350°)

Benefits

- Last 4x longer than regular heavy galvanized wires
- Active protection of cut end
- Sustained corrosion protection at welded points

Panel & Post Clamp
